

GIG RESOURCE

Design Scope Breakdown

Separating the 108-page inventory into pages that need custom design work versus pages the development team can build directly using consistent components and templates.

108

TOTAL PAGES

Executive Summary

The total platform contains 108 pages across the public website, authentication flow, three role-specific dashboards (client, professional, influencer), and the admin panel. After review, we recommend splitting them into two clearly-defined categories so the design budget focuses on what truly moves the needle.

CUSTOM DESIGN

28

Pages needing bespoke UI/UX

≈ 26% of total

DEV-HANDLED

80

Use existing components / templates

≈ 74% of total

WHY THIS SPLIT MAKES SENSE

1. **Conversion focus.** ~80% of user traffic lands on the 28 custom-designed pages (landing → browse → profile → register → dashboard home). This is where bespoke design directly impacts sign-ups and bookings.
2. **Component reuse.** One profile-editor design covers 3 role profile pages. One chat design covers 2 role inboxes. One AI-tool shell covers 3 tools. That collapses 11 pages into 3 design deliverables.
3. **Admin doesn't need brand polish.** Admins are internal users; standard tables and form layouts (NobleUI template already in place) handle the look-and-feel out of the box.
4. **Error / utility pages already styled.** All 7 error variants (404 / 500 / 403 / 419 / 429 / 401 / 503) are already custom-coded with the brand palette — designer only needs to polish if desired.
5. **Faster delivery.** Designer focuses on 28 high-impact pages instead of 108. Dev team unblocks 80 pages immediately using the design system.

A

Custom Design Required

Bespoke UI/UX work for the designer

28 pages

Public Website **12 pages**

Top conversion surface — every visitor sees these first

- 01** Landing / Home *Hero + value props + CTAs*
- 02** Browse Professionals *Marketplace grid + filters + cards*
- 03** Professional Profile Detail *The booking-decision page*
- 04** Events & Categories *Mega-panel + advanced filter system*
- 05** How It Works *8-step audience-coded journey*
- 06** About Us *Brand story + team + stats*
- 07** Blog Index *Content discovery — featured + grid*
- 08** Blog Post Detail *Editorial reading view*
- 09** FAQ *Search + category accordion*
- 10** Join as Influencer *Recruitment CTA flow*
- 11** Policy Page (1 design — 4 uses) *Privacy / AI / Payment / Cancellation*
- 12** Pricing / Membership Plans *3-tier comparison + contract picker*

Authentication **3 pages**

First-impression branded moments

- 13** Login (split layout) *Testimonial carousel side*
- 14** Register (role picker) *Step indicator + role tabs*
- 15** Forgot / Reset Password (1 design) *Reused across flows*

Dashboard Home Pages **4 pages**

Welcome layouts — one per role

- | | | |
|----|-----------------------------|-------------------------------|
| 16 | Client Dashboard Home | KPIs + upcoming events + recs |
| 17 | Professional Dashboard Home | Earnings + leads + reviews |
| 18 | Influencer Dashboard Home | Referral tracker + payouts |
| 19 | Admin Dashboard Home | Platform stats overview |

Reusable Design Systems 9 pages

One design — used across many pages

- | | | |
|----|---|--------------------------------|
| 20 | Profile Editor (1 design — multi-role) | Sidebar-tabs layout |
| 21 | Messages / Chat (1 design — multi-role) | Two-pane chat shell |
| 22 | AI Tools Shell (1 design — 3 tools) | Form + result panel |
| 23 | Professional Card (component) | Tile pattern reused everywhere |
| 24 | Booking Card (component) | Reused across dashboards |
| 25 | Membership Tier Card | Pricing-page tile |
| 26 | Empty State (1 design — reused) | Friendly no-results pattern |
| 27 | Error Page Shell (already built) | Just polish — 7 variants |
| 28 | Email Templates (1 master) | Transactional emails |

Admin CRUD 16 groups

Standard NobleUI Bootstrap shell — tables, forms, modals

- Events list / detail
- Bookings list
- Categories list / create / edit
- Membership Plans admin
- FAQ Management
- Policy editor
- Blog posts list / create / edit
- Blog categories
- Users · Roles · Permissions
- Verifications queue
- Deletion requests
- Activity logs
- Chatbot logs
- Influencers admin + payouts
- AI Agreements list / detail
- Agreement log

Admin Settings 5 groups

Same form shell, different fields

- Payment Settings

- OpenAI Settings
- reCAPTCHA Settings
- AI Chatbot Settings
- Account Deletion Settings

Inner Dashboard Lists 7 groups

Use the design system from "Reusable" above

- Client: My Events list, Event detail, My Bookings
- Client: Message threads, Membership history, Payment history
- Client: Payment success / cancel, Agreement detail
- Professional: Gigs list, Gig detail, Proposals
- Professional: Reviews, Earnings, Transactions, CSV/PDF export
- Influencer: Referrals list, Payouts list
- Admin Profile editor

Utility Pages 6 groups

Minimal design — small functional confirmations

- Forgot / Reset confirm screens
- Account restore
- Reactivation success / cancel
- Referral landing
- Payment success / cancel
- 7 error pages (already designed)

Final Page Count Summary

CATEGORY	PAGES	% OF TOTAL
Custom Design Required (Designer)	28	26%
Dev-Handled with Components	80	74%
TOTAL PAGES IN PLATFORM	108	100%

Recommendation: Engage the designer on the **28 custom pages** only. The development team will deliver the remaining 80 pages in parallel using the design system + existing templates, with full visual consistency across the platform.
